

### Features:

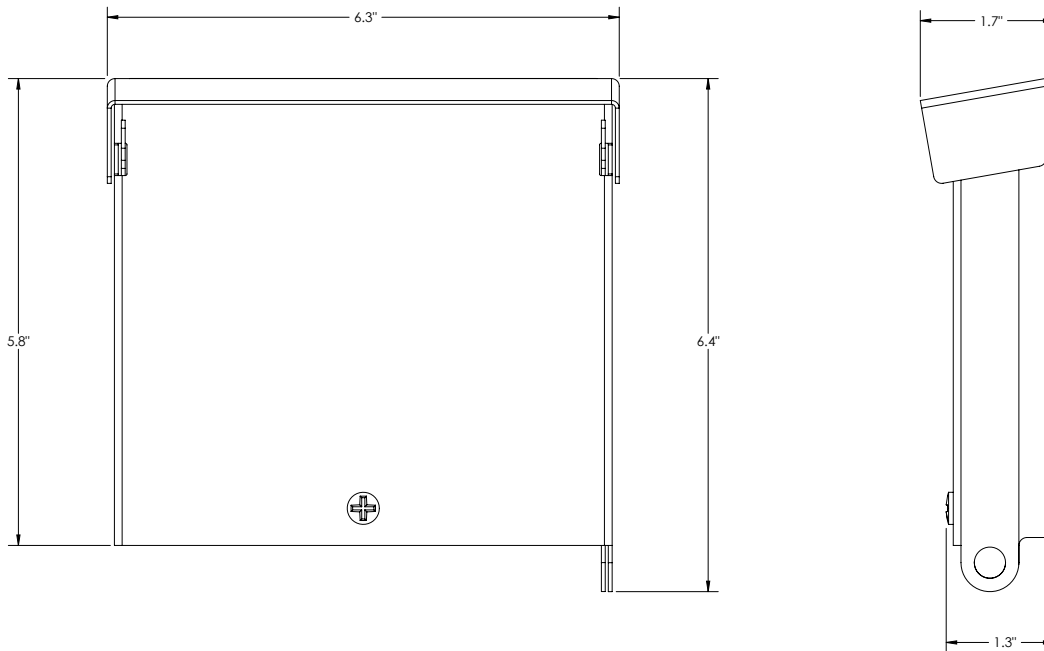

- Sturdy steel construction
- Protects RM-1000 from harmful affects of UV sunlight
- Protects RM-1000 from harmful affects of hail
- Removable front cover for easy access when programming the RM-1000
- Securable with padlock

The RM-1000-ENCL is a steel enclosure for protecting a SymCom RM-1000 remote communications monitor from adverse affects of weather and vandalism, while allowing normal communications connections to the RM-1000 unit. Its superior design protects an RM-1000 from overexposure to UV sunlight as well as from hail during a storm, and it incorporates a seal around the opening in the back to seal the unit to the electrical box, keeping rain from contacting the RM-1000 connections. The enclosure unit mounts using the same hardware supplied with the RM-1000 unit. The steel enclosure also features a built-in padlock tab (padlock not included) to lock the cover to deter vandalism. The RM-1000-ENCL is sold separately from the RM-1000 remote communications monitor.

## Specifications

General Characteristics	
Dimensions	6.4" H x 6.3" W x 1.7" D
Weight	1.4 lbs.
Material	Cold rolled steel, 0.048" thick
Mounting Method	Uses same hardware supplied with RM-1000
Removable Front Cover	Latches in place and fastened with Zeus fastener
Security	Padlock tab (padlock not included)
