

Liquid Level Controllers

Are you looking for accuracy, reliability and a cost-effective fluid level sensor for your holding tank applications?

This may be what you're looking for...

- ✓ One device that does the job of two products - pump-up or pump-down
- ✓ Instant plug-in replacement for Gem or Crouzet products
- ✓ Software controlled product which allows you more flexibility in determining how the unit is to be used when installed versus a hardware controlled product
- ✓ Cost effective savings over similar products
- ✓ Fixed 2 second debounce delay in case of splashing liquid
- ✓ Resistance adjustable sensitivity knob
- ✓ Single, common or dual probe configuration
- ✓ LED indicates when relay is energized
- ✓ Use in conductive and non-conductive tanks
